

Machine Repair, Part Manufacturing and Portable Machining

24 Hour Emergency Service

In 1979, Grand Rapids Machine Repair incorporated with three employees and 1700 square feet of floor space. Today a staff of 25 including 20 experienced machinists and machine repairmen work a large inventory of equipment at two buildings. Portable equipment further expands our capabilities, as Grand Rapids Machine Repair travels the continental United States to meet our client's needs.

We are a third generation, family owned and operated business. Ronald Brow Sr. now retired remembers Ron Jr. began working for the company and learning from the Best when he was just 15 years old and is currently the President. The family's close knit values and strong work ethics translate into honest dependable service.

In 1996, Grand Rapids Machine Repair more than doubled in size by adding a new plant solely devoted to housing our Full Service Machine Shop. Originally part of the Repair Shop, our Machine Shop's location at 3710 Linden allows us to expand and improve our services in both realms, with quality workmanship being our ultimate goal.

With our many years of experience and variety of services we offer in our rigging, machining and repairing departments, Grand Rapids Machine Repair should be your First Choice.

Rigging and Moving

Super Shakers

Machining, Repairing, Rigging and Moving.

Machine Shop

The Grand Rapids Machine Repair Machine Shop is a full service machine shop, committed to conform to our customer's needs. When

you require new or repaired parts, we're your answer! Whether it be an emergency or a standard delivery, we go all out to provide your parts to exacting standards on time as promised.

Machine Repair

We are known as the "Press Repair Specialists" but over the years we have evolved into a more diversified repair company with experience

repairing injection molding machines, conveyor systems and many other forms of industrial equipment. No job is too big or too small for our experienced crew.

Transportation Services Available

24 Hour Emergency Service

When your machine can't come to us, our fully-equipped rigging and tool vans come to you.

Portable Machining

Grand Rapids Machine Repair offers a variety of portable machining options.

When the scope of work will not allow

disassembly and machine work at our facility, we can bring our portable machining equipment and skilled expertise to you. Call us to learn more about our capabilities and quick response.

Boring Mill

From our largest boring mill, a 5" spindle with a 10'X20" twenty feet traverse capability, to our smallest, with a 3" spindle and a work area of

3'X6', we can machine a full spectrum of machine parts. All of our mills are fully equipped with turn tables, digital readouts and an extensive tooling cache.

Rigging and Moving

We specialize in the rigging and moving of machines. Whether you are moving machines within your existing building or moving your plant to an entirely new location, we can do it all.

Our experienced team of repairman are ready to "Make your Move". No job is too big or small.
